- 3M[™] Command Strips work best to avoid damage to the walls. 3M[™] makes both hooks and Velcro[®] style attachment aids. Be sure to check the instructions and weight load of the product, so that your hanging item doesn't fall off and get damaged.
- When it's time to remove the strips, put in a maintenance request and <u>Plant Services will</u> <u>take the strips off</u>. Do NOT yank them off the wall! (There's a method for taking these off, including using dental floss for broken strips.)
